**Dear Creative Cirlce,**

Your company recently posted a job listing on the craigslist job board for a Web Designer. After carefully reading over your listing, I came to the conclusion that my skills and qualifications are a perfect match to fill this position.

I am a hybrid Web Designer / Front End Developer with over 4 years of experience building websites for a variety of different clients from a variety of different industries. I have done agency work as well as freelance, and have had a long history of success seeing webpages all the way through, from the initial sitemap phase to launch.

I have a firm grasp of front end technologies such as HTML5, CSS3, jQuery, Javascript, and various javascript plugins and APIs, as well as experience building custom Wordpress themes and plugins from scratch. I employ Git for version control and I am naturally drawn to writing clean, reusable code.

As a hybrid designer / developer, I am uniquely capable at handling nearly all aspects of design and development. I have extensive experience in the latest web technologies and tools and am always striving to add new items to my ever-expanding skill set, because let's face it, the list of technologies and tools we have to learn is ever-expanding as well. I believe in this industry the ability to learn quickly and efficiently is the most valuable skill one can possess and I have gone to great lengths to hone this talent in myself. I am always trying to fine better, more efficient ways to accomplish my tasks, and I am looking for a new home where I can continue to grow and cultivate my talents in the company of equally talented and driven individuals.

For additional information on my specific skills and qualifications, please refer to my attached resume. I thank you for your time and I look forward to hearing from you.

Sincerely,  
Dan Bernardi
